

Sinclair Broadcasting's airing of an anti-Kerry "documentary" just days before the election is a frightening example of attempted media control and propaganda.

Large companies or ANY entity cannot be permitted to control these airways on their whim. Sinclair uses the public airwaves free of charge, and is obligated by law to serve the public interest. This is an assault on deeply held American values.

Sinclair's actions demonstrate clearly the need to strengthen media ownership rules, not weaken them. The license renewal process needs to be substantive. Thank you.
